

SAILING WITH PUPA YACHTING

When to go?

The period 'late June-early September' is the hottest at the Aegean and Mediterranean coasts. That's why the demand as well as the prices reach the highest positions at this time.

The period 'June-middle of July and after first week of September' is better for resting here. And if you wish to have a rest in May or October you should know that evenings are cool.

In May the sea water only starts to warm, but it remains warm till the middle of November.
